

nlohmann::basic_json
::basic_json

nlohmann::adl_serializer
::to_json

nlohmann::detail::to_json

```
graph LR; A[nlohmann::basic_json::basic_json] --> C[nlohmann::detail::to_json]; B[nlohmann::adl_serializer::to_json] --> C;
```

The diagram illustrates a relationship between three function signatures. On the left, there are two white rectangular boxes. The top box contains the text 'nlohmann::basic_json::basic_json'. The bottom box contains the text 'nlohmann::adl_serializer::to_json'. On the right, there is a single gray rectangular box containing the text 'nlohmann::detail::to_json'. Two blue arrows originate from the right side of the two boxes on the left and point towards the left side of the gray box on the right, indicating that both functions on the left are mapped to or implemented by the function on the right.
