

```
std::hash< HF::SpatialStructures  
::Node >::operator()
```

```
graph LR; A["std::hash< HF::SpatialStructures  
::Node >::operator()"] --> B["std::hash_combine_impl"]; B --> B;
```

The diagram illustrates a function call. A white rectangular box on the left contains the code `std::hash< HF::SpatialStructures::Node >::operator()`. A straight blue arrow points from the right side of this box to a gray rectangular box on the right, which contains the code `std::hash_combine_impl`. Above the gray box, a curved blue arrow starts from its top edge and points back to its top edge, representing a self-call or a loop.

```
std::hash_combine_impl
```
