

nanort::IntersectRayAABB  
< double >

nanort::IntersectRayAABB  
< float >

nanort::safemax

```
graph LR; A[nanort::IntersectRayAABB< double >] --> C[nanort::safemax]; B[nanort::IntersectRayAABB< float >] --> C;
```

The diagram illustrates a relationship between two function templates and a common variable. On the left, there are two white rectangular boxes. The top box contains the text 'nanort::IntersectRayAABB' followed by '< double >' on the next line. The bottom box contains the text 'nanort::IntersectRayAABB' followed by '< float >' on the next line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text 'nanort::safemax'.
