

nlohmann::detail::json
_sax_dom_parser::number_float

```
graph LR; A[nlohmann::detail::json_sax_dom_parser::number_float] --> B[nlohmann::detail::json_sax_dom_parser::handle_value]
```

The diagram illustrates a function call. A grey rectangular box on the left contains the text 'nlohmann::detail::json' followed by '_sax_dom_parser::number_float' on the next line. A dark blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'nlohmann::detail::json' followed by '_sax_dom_parser::handle_value' on the next line.
