

GraphTests::TEST

GraphExampleTests::TEST

HF::SpatialStructures  
::Graph::GetUndirectedEdges

```
graph LR; A[GraphTests::TEST] --> C[HF::SpatialStructures::Graph::GetUndirectedEdges]; B[GraphExampleTests::TEST] --> C;
```

The diagram illustrates a dependency or relationship between two test classes and a shared method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'GraphTests::TEST' and the bottom box contains 'GraphExampleTests::TEST'. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top of a larger gray rectangular box on the right. The arrow from the bottom box points to the bottom of the same gray box. This gray box contains the text 'HF::SpatialStructures' on the top line and '::Graph::GetUndirectedEdges' on the bottom line.
