

nlohmann::basic_json
::operator+=

nlohmann::basic_json
::push_back

nlohmann::basic_json
::push_back

```
graph LR; A[nlohmann::basic_json::operator+=] --> C[nlohmann::basic_json::push_back]; B[nlohmann::basic_json::push_back] --> C;
```

The diagram illustrates a mapping between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'nlohmann::basic_json::operator+='. The bottom box contains the text 'nlohmann::basic_json::push_back'. On the right, there is a single gray rectangular box containing the text 'nlohmann::basic_json::push_back'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'operator+=' and 'push_back' from the left map to the 'push_back' function on the right.
